<u></u>	Description Rechit Children Steeling Section Rechit	EMPBTECH.
13 TEMPE	You are the head of the election committee in your village. Each Political party is associated with a unique number and the votes are represented as an integer array A. where each element contains the party number voted for by the villagers. For a party to win, they must have a majority of votes. our task is to find and return an integer value denoting the winning party's number. Return -1 if there is no party with a majority.	EMPSTECY
LEME	Note: If only one vote is there he is the winner.	,
O13 LENE	Input Format :	?BTechi.E
	input1: An integer value representing the number the number of voters	SB,
TEMPRI	<b>input2:</b> An integer array A representing the votes of the voters.	5
5	output Format:	NP BT echi
ć	Return an integer value denoting the winning party's number.Return -1 there is no party with a majority	7
3 LEMPB	Example 1:	خ
()	Input:	stech Ect
ENPBIEC	6	,
EMPB.		Mark & C
	Output:	BURGE
TEMPBIC	2	
LEW.	Explanation:	THE CITY
	As 2 got the most number of votes i.e 3.	Strip.
	Example 2:	e.S
	Input:	THE CH
	121122	Me
	121122 Output:	26
	Output:	at & Other
	-1	×

**Explanation:** 

**Source Code:** 

```
N = int(input())
A = list(map(int,input().strip().split()))[:N]
freq = dict()
for party in A:
    if party in freq.keys():
        freq[party]+=1
    else:
        freq[party]=1
maximum = 0
answer = 0
count = 0
for key,value in freq.items():
    if maximum < value:</pre>
        maximum = value
        answer = key
for value in freq.values():
    if maximum==value:
        count+=1
if count>1:
    print(-1)
else:
    print(answer)
```
